# CUSTOMIZED ISP SOLUTIONS

We offer a comprehensive, end-to-end approach to ISP infrastructure, providing personalized solutions that extend from foundational power setup through data management, and beyond.

Our custom infrastructure installations, from adaptable ladder racking to solid support structures, are crafted for both efficiency and reliability. With these pieces brought together seamlessly, we build an optimized ISP framework poised to power your operations into the future.
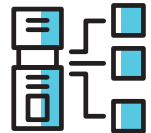

SEAMLESS CONNECTIVITY SOLUTIONS

▲ **Fiber Optic Implementation:** Supply, test, and install state-of-the-art fiber optic networks with advanced EXFO scopes for inspection and SFP tuning for optimal performance. Custom labeling ensures clear identification.

▲ **Coaxial Configuration:** Expert installation of ATX devices, supported by precise signal measurement using XM2 meters, with the option for ONX-630 for enhanced diagnostics. Each coaxial solution is neatly dressed and clearly labeled.

▲ **Ethernet Cabling Excellence:** Meticulous installation and organization of CAT5/6 cables, featuring customizable labeling options that align with your network standards and simplify maintenance.

DYNAMIC POWER MANAGEMENT

Our Power Management services ensure that your headend is powered efficiently and reliably, offering comprehensive panel installations and versatile device powering options to meet the dynamic needs of modern network operations.

▲ **Supplied Materials:** We provide all essential materials, ensuring the highest quality and compatibility for your power infrastructure.

▲ **Tooling Capability:** Access to specialized Burndy tools for up to 500 MCM Telcoflex cable, ready for the most demanding installations.

▲ **Grounding Solutions:** Secure and robust ground ring installations and in-rack ground bars to maintain system integrity and safety.

PRECISION CATALOGING & COMPREHENSIVE DATA MANAGEMENT

Elevate your network's efficiency with our meticulous Cataloging & Data Management services, designed to ensure the integrity and accessibility of your critical infrastructure information.

▲ **Audit & Documentation:** Rigorous cable tracing and verification processes coupled with detailed headend floorplan documentation to support network reliability and serviceability.

▲ **Data Capture:** Systematic cataloging of vital network data, offering a spectrum of presentation options tailored to suit operational needs and facilitate strategic planning.

DEDICATED MIGRATION & SUPPORT SERVICES

Maximize your network's potential with our full-spectrum Migration & Support Services, ensuring smooth transitions and continuous operational excellence for your ISP infrastructure.

▲ **Onsite Assistance:** Our team delivers comprehensive support for device installations, migrations, and servicing, including CMTS, transport systems, and monitoring for unrivaled reliability.

▲ **Metro Ethernet Services:** Specialized in both the installation and migration of Metro Ethernet services to provide high-speed, reliable connectivity for urban networks.

▲ **OSP/ISP Integration:** Our team manages full-scope projects to ensure OSP changes integrate seamlessly with ISP systems, achieving superior network performance and reducing potential for increased downtime.

▲ **Network Optimization:** Expert node splitting and balancing services to enhance your network's efficiency and capacity, tailored for both existing systems and new deployments.
